

# ELIOT SUBSTATION CONSTRUCTION PROJECT

## PROJECT TYPE

Substation

## SCOPE

Performed the greenfeild construction of a 345kV substation.

## LOCATION

Eliot, Maine

## CLIENT

Eversource Energy

## START DATE

May 2012

## COMPLETION DATE

December 2013

Eversource Energy ("Eversource") provides power to more than 3.6 million electric and natural gas customers in the northeastern United States. In May 2012, Eversource contracted Irby to perform the greenfield construction of a substation near Eliot, Maine in support of its efforts to connect the 345kV Deerfield, Newington, and Maguire Road lines into the Central Maine Power System.

Supported by a coalition of Quanta Services companies (Irby, Dashiell Engineering, and Real-time Engineering are Quanta Services subsidiaries (PWR:NYSE)), the project was delivered on-time, to budget, and without incident in December 2013.
