

# HURRICANE IRMA EMERGENCY POWER RESTORATION

## PROJECT TYPE

Emergency Restoration

## SCOPE

Performed emergency power restoration services throughout Florida in the wake of Hurricane Irma.

## LOCATION

Florida, USA

## START DATE

September 2017

## COMPLETION DATE

September 2017

On 10 September 2017, Hurricane Irma made landfall on Florida's Atlantic seaboard. The storm caused significant damage to power transmission infrastructure resulting in a loss of power to over 6 million Floridians.

Irby crews, attending emergency restoration activities on the Gulf Coast as a result of Hurricane Harvey, adapted deployments to provide needed specialist personnel and equipment to restoration efforts in Florida. By months end, power had been restored to pre-storm output levels.
