

MARSHALL FORD-LAGO VISTA 138KV TRANSMISSION LINE CONSTRUCTION PROJECT

PROJECT TYPE

Transmission, Water Crossing

SCOPE

Performed a 14.5 mile 138kV transmission line upgrade including a 1.3 mile crossing over Lake Travis.

LOCATION

Austin, Texas

CLIENT

Lower Colorado River Authority

START DATE

March 2016

COMPLETION DATE

April 2016

In March 2016, Irby Construction was contracted by the Lower Colorado River Authority ("LCRA") to perform the Marshall Ford to Lago Vista 138kV Transmission Line Construction Project. The project scope included the replacement of a 1.3 mile transmission line across Lake Travis plus the upgrade of an existing 14.5 mile transmission line (69kV to 138kV).

Irby Construction successfully completed this project in April of 2016 to schedule and budget.
