

VALLIANT-NORTHWEST TEXARCANA 345KV TRANSMISSION LINE CONSTRUCTION PROJECT

PROJECT TYPE

Transmission

SCOPE

Constructed 43.5 miles of 345kV transmission line in Northeast Texas.

LOCATION

New Boston, Texas

CLIENT

American Electric Power

START DATE

April 2016

COMPLETION DATE

January 2017

In April 2016, Irby Construction was awarded the contract for the construction of the Valliant to Northwest Texarkana Transmission Line project for AEP Southwestern Electric Power Company and AEP Oklahoma Transmission Company.

The project consisted of the installation of 43.5 miles of 345kV single steel pole transmission line on anchor-bolted foundations. Irby was supported by Erickson Air Crane and Winco for helicopter pole erection work scopes (Irby and Winco are Quanta Services subsidiary companies (PWR:NYSE)). The project was completed on time and with zero lost time incidents in January 2017.
