

TELECOMMUNICATIONS

IRBY CONSTRUCTS, INSTALLS, INSPECTS, UPGRADES, AND MAINTAINS INFRASTRUCTURE.

Underground and overhead, Irby Construction offers turnkey project delivery for new construction, retrofitting, emergency service restoration, and maintenance projects. We serve clients in the utility and telecommunication industries with a comprehensive scope of work including:

- Engineering, design and permitting
- Directional drilling/boring
- Copper and fiber cable placement
- Conduit and duct bank system placement
- Cable plowing
- Fiber to the home (FTTH)
- Fiber blowing
- Fiber pulling
- Trenching and plowing
- Manhole placing: precast, poured-in-place and retrofit applications
- Aerial antenna placement
- Wireless and tower services
- Commercial and distribution infrastructure builds
- Long haul, fiber rings, point-to-point and in line extension
- Asset management documentation and recovery
- Aerial, buried, and underground construction applications

PROVEN PERFORMANCE

At Irby, we're committed to each other and our clients. That means we stand for safety, the environment, meeting project timelines, and delivering within the project budget. What's more we have the manpower, equipment and geographic reach to meet virtually any client need. The long-term relationships we share with our clients are proof of our ability to deliver on these promises.
