

FOUNDATIONS

IRBY
CONSTRUCTION

A QUANTA SERVICES COMPANY

IRBY CONSTRUCTS, INSTALLS, INSPECTS, UPGRADES AND MAINTAINS ELECTRIC POWER AND INFRASTRUCTURE.

Irby Construction's comprehensive scope of work starts with building solid foundations to support the structures we build. Our experienced team is equipped to take on the most challenging foundation projects for electric transmission infrastructure. The various pier formation types we put in place support single piers, H-Frames, 3-pole structures and lattice towers.

- Large pier-drilling
- Slab foundations
- Amphibious construction
- Slurry and rock drilling
- Casing holes

SPECIALIZED SERVICE DIVISIONS

Irby's foundation divisions, Legend Foundation Services and Marathon Construction Services, bring specialized knowledge and experienced teams to every jobsite. Whether building on wetlands or in harsh weather conditions, these divisions are known for delivering projects successfully even when difficult conditions are encountered.

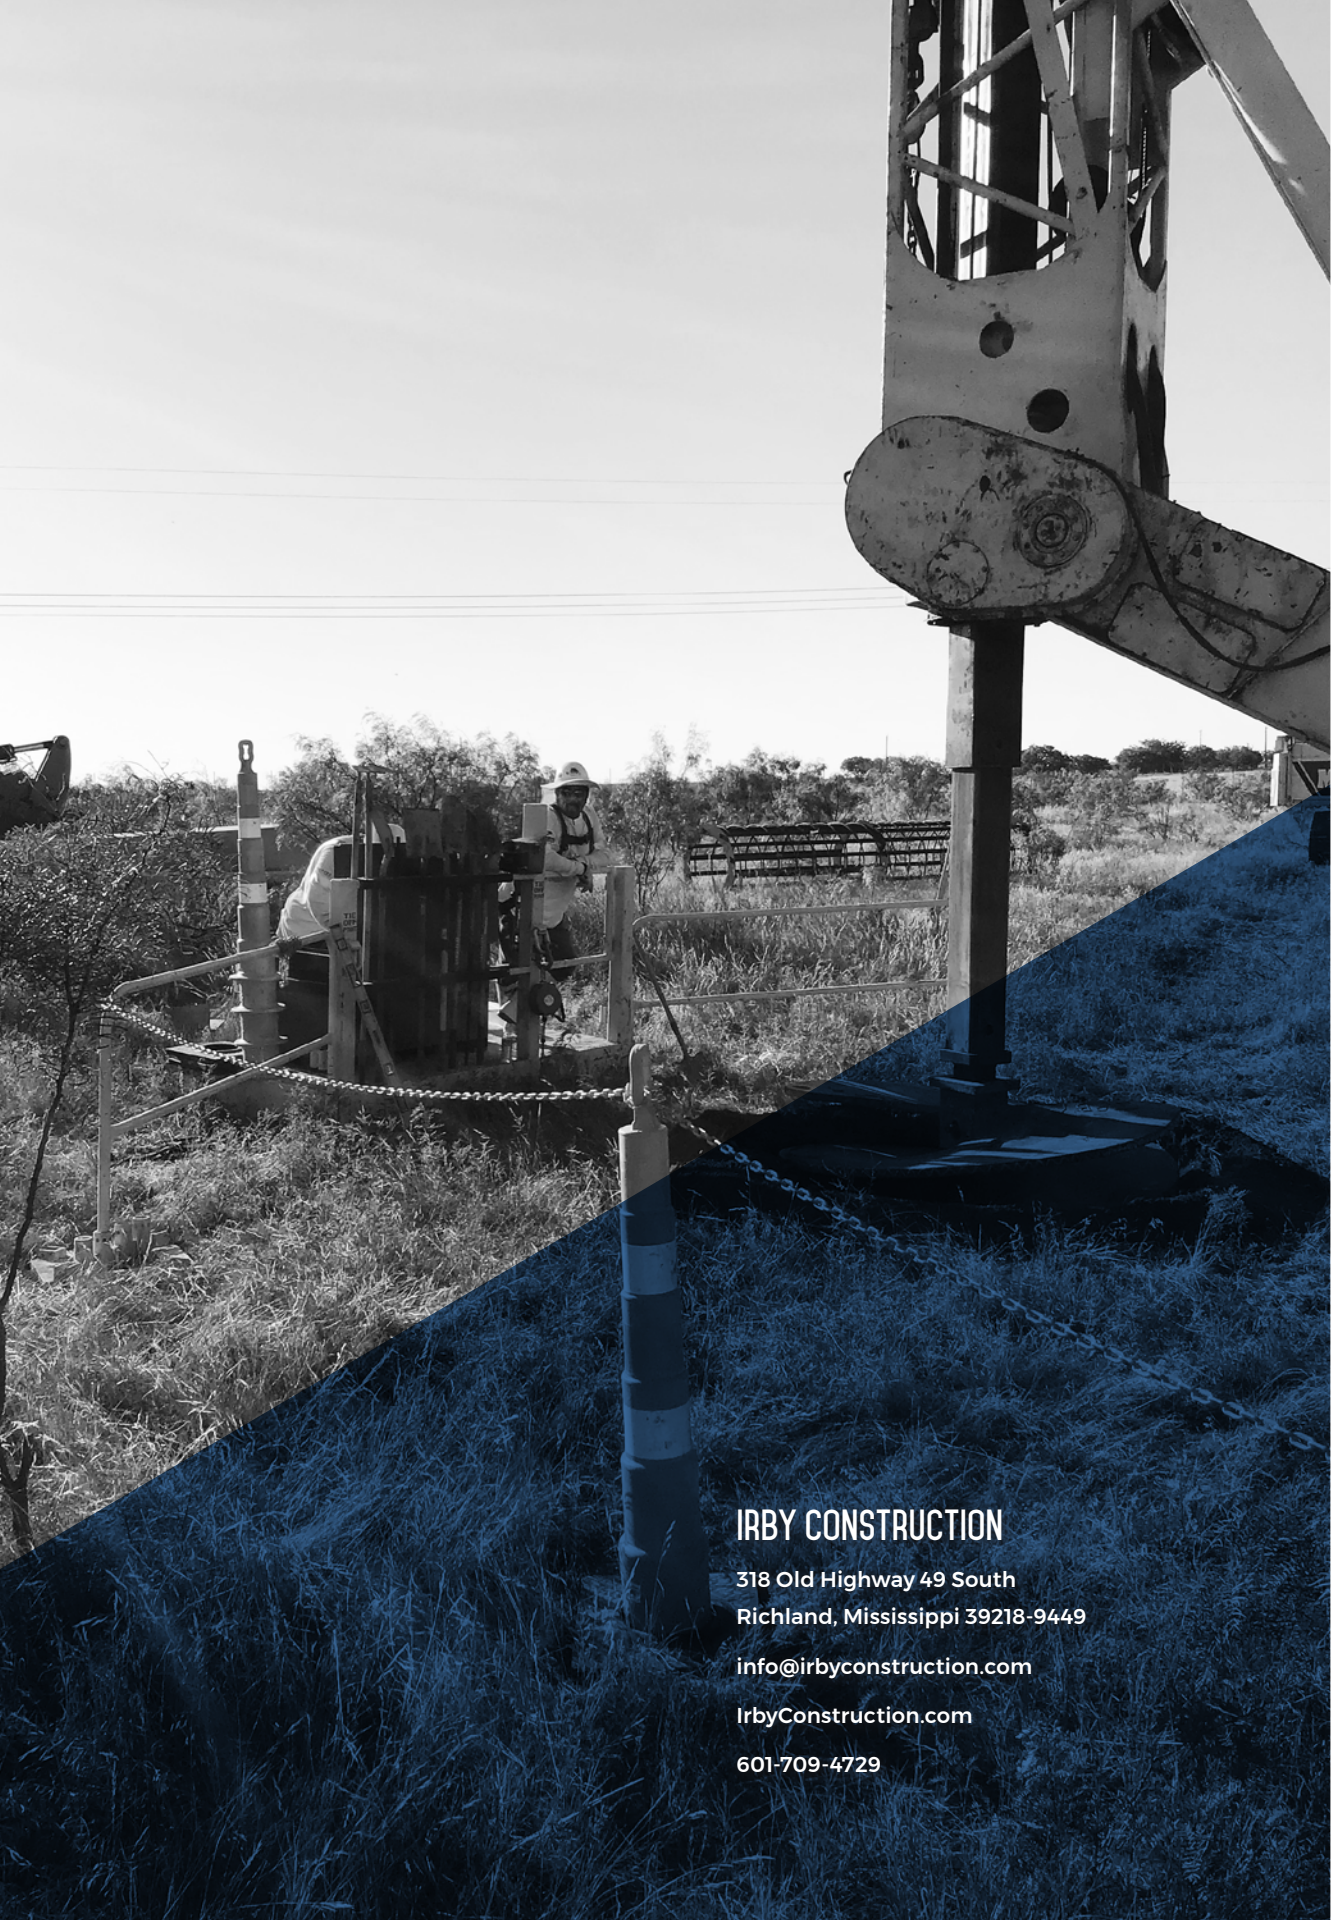

A COMPREHENSIVE APPROACH

The Irby team works closely with strategic partners to integrate the engineering process. Our team prides itself on being thorough in obtaining designs and submittals before work begins, thereby streamlining workflow. Moreover, we are committed to addressing every detail of the specifications provided by owners and engineers, to ensure the project is completed properly according to standards.

Specific procedures guide all of our fieldwork ensuring the safety of our team. This is our number one focus in everything we do.
