GUIDANCE FOR UNVACCINATED PEOPLE

Your Guide to Masks

Updated June 29, 2021

[Print](#)

- If you are not fully vaccinated and aged 2 or older, you should wear a mask in indoor public places.
- In general, you do not need to wear a mask in outdoor settings.
 - In areas with [high numbers of COVID-19 cases](#), consider wearing a mask in crowded outdoor settings and for activities with close contact with others who are not fully vaccinated.
- If you are fully vaccinated and have a condition or are taking medications that weaken your immune system, you may need to keep taking steps to protect yourself, like wearing a mask. Talk to your healthcare provider about steps you can take to manage your health and risks.
- If you are fully vaccinated, see [When You've Been Fully Vaccinated](#).

Masks are required on planes, buses, trains, and other forms of public transportation traveling into, within, or out of the United States and in U.S. transportation hubs such as airports and stations. Travelers are not required to wear a mask in outdoor areas of a conveyance (like on a ferry or the top deck of a bus). CDC recommends that travelers who are not [fully vaccinated](#) continue to wear a mask and maintain physical distance when traveling.

How to Select

When selecting a mask, there are many choices. Here are some do's and don'ts.

DO choose masks that

Have two or more layers of washable, breathable fabric

Completely cover your nose and mouth

Fit snugly against the sides of your face and don't have gaps

Have a nose wire to prevent air from leaking out of the top of the mask

DO NOT choose masks that

Are made of fabric that makes it hard to breathe, for example, vinyl

Have exhalation valves or vents which allow virus particles to escape

Are prioritized for healthcare workers, including N95 respirators

Leaving out or the top of the mask

Special Considerations

Gaiters & face shields

Wear a gaiter with two layers, or fold it to make two layers

Not recommended: Evaluation of face shields is ongoing, but effectiveness is unknown at this time.

Children

Find a mask that is made for children to help ensure proper fit

Check to be sure the mask fits snugly over the nose and mouth and under the chin and that there are no gaps around the sides

Do NOT put on children younger than 2 years old

People with beards

Certain types of facial hair, like beards, can make mask fitting difficult. Masks that fit well protect you better. To have a better fit, people with beards can shave their beards or trim their beards close to the face.

Other ways to improve fit

Use a mask fitter or brace.

Wear one disposable mask underneath a cloth mask that has multiple layers of fabric. The second mask should push the edges of the inner mask against the face and beard.

For people with beards that are not trimmed close to the face, masks may fit loosely around the beard. However, people with beards should still wear a mask. Masks designed for people with beards are being evaluated, and information will be provided when it becomes available.

For more information on evidence for effectiveness of masks, other types of face protection, and mask alternatives, see [Guidance for Wearing Masks](#)

How to Wear

Wear a mask **correctly** and **consistently** for the best protection.

- Be sure to [wash your hands or use hand sanitizer](#) before putting on a mask.

- Do **NOT** touch the mask when wearing it. If you have to often touch/adjust your mask, it doesn't fit you properly, and you may need to find a different mask or make adjustments.

For more information, visit our [How to Wear Masks](#) web page.

Do wear a mask that

- Covers your nose and mouth and secure it under your chin.
- Fits snugly against the sides of your face.

How NOT to wear a mask

Around your neck

On your forehead

Under your nose

Only on your nose

On your chin

Dangling from one ear

On your arm

How to take off a mask

1

Carefully, untie the strings behind your head or stretch the ear loops

2

Handle only by the ear loops or ties

3

Fold the outside corners together

4

Be careful not to touch your eyes, nose, and mouth when removing and wash hands immediately after removing

How to Clean

Reusable masks should be washed regularly. Always [remove masks correctly](#) and [wash your hands](#) after handling or touching a used mask.

- Include your mask with your regular laundry
- Use regular laundry detergent and the warmest appropriate water setting for the cloth used to make the mask
- Use the highest heat setting and leave in the dryer until completely dry

For more information, visit our [How to Wash Masks](#) web page.
